

MR-2

2-way valve with electromotive actuator

The 2-way valve is equipped with an electric motorised actuator and is used to control a constant air discharge temperature of the Air Curtain. A sensor is installed in the air discharge area to monitor the temperature. The TCX control unit installed in the Air Curtain sends the signals for opening or closing to the actuator depending on the measured air discharge temperature.

Technical Data	DN20
Valve	
Kvs value angle valve	7.5 m³/h
Kvs value straight valve	5.5 m³/h
Max. differential pressure	350 mbar
Actuator	
Operating voltage	230 V AC ±10%; 50/60 Hz
Power consumption	2.5 VA at AC
Activation	3-point regulation
Type of protection	IP 40 according to EN 60529
Protection class	230 V: II according to EN 60730
Media temperature	max. 100 °C
Ambient temperature	0 to 50 °C (non-condensing)
Connection cable	3 x 0.34 mm², length 1.5 m
